

## prenatal partners for life

Dear Friends,

Prenatal Partners for Life is proud and excited to co-sponsor a national billboard campaign with Pro-life Across America featuring a child with Down syndrome. Pro-life Across America is known throughout the country for its compassionate, life-saving billboard outreach. This is the first time they will feature beautiful babies with special needs in an effort to educate people that **EVERY** baby is made in the image and likeness of God and has a place and purpose in the world.

It has been said that today, the womb is one of the most dangerous places in the world for a baby. This is especially true for babies prenatally diagnosed with a condition like Down syndrome. Studies show that **90%** of these precious babies are aborted. With new earlier prenatal testing recommended for **all** pregnant women, that number is likely to rise. The world is in danger of not having many of these precious children around to teach us important lessons about life and love. They really are teachers of our souls, and the world desperately needs them.

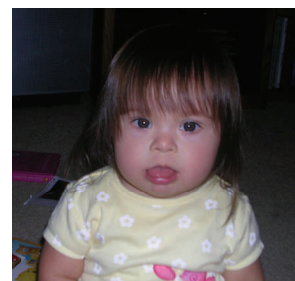

This nation wide campaign of 300-600 billboards will feature a precious child along with a positive, persuasive message offering the support, information, and encouragement needed to choose life. Won't you please help us save these precious children? Many people do not know there is a waiting list for those who want to adopt a child with Down syndrome. Millions of people will view the billboards, and minds and hearts will be changed. Most importantly, the precious lives of these special children will be saved.

These ads are very expensive to produce and sponsor. **100%** of every dollar donated to **PPFL-Billboard Campaign** will go directly to Pro-life Across America specifically for this first time special campaign. Please be generous and give as much as you can. Most importantly please **PRAY** for the success of this campaign. With your help we can create an authentic atmosphere of love for **all** life.

Thank you and God bless you for your help,

Mary Kellett
